

# Welcome to WOW

WOW stands for the World of Wireless. And WOW is the only word to describe Honeywell's new portfolio of comfort systems — designed to revolutionize the HVAC industry.

This complete lineup of wireless-enabled systems and components make it easy to solve what-used-to-be problems and meet your customers' comfort needs, with everything that you need to easily:

- Relocate a Thermostat
- Upgrade to Multi-Stage Equipment
- Add Cooling
- Display Outdoor Temperature and Humidity
- Offer Temperature Control On-Demand
- Easily Zone a Home Without Running Thermostat Wires
- Control All Zones From a Single Control
- Wirelessly Control Humidity

REDLINK™  
ENGINEERED  
FOR YOU

## Wireless Technology

# Exclusive Honeywell Technology Makes It Possible

### INTRODUCING REDLINK™

With wireless security systems installed in more than 100 million homes protecting people and property around the clock, Honeywell is a leader in wireless technology. Now Honeywell brings you RedLINK™—the first wireless technology engineered specifically for HVAC applications.

### REALIZE THE POSSIBILITIES

RedLINK Wireless Technology eliminates the need to run wires in many applications and enables homeowners to have advanced comfort control anywhere in the home.

### WORKS EVERY TIME

The RedLINK signal has been tested and proven to work through concrete, brick and other building materials in homes up to 6,500 square feet with multiple levels. It works every time in every home.

### ZERO INTERFERENCE

RedLINK's ability to "hop frequencies" means that the signal is secure. It won't affect or be effected by other wireless devices in the home such as baby monitors and cordless phones — or with neighboring systems.

### TRUST

Backed by proven Honeywell technology, internal safeguards continuously self-check the signal — so it's never lost.

RedLINK is Reliability.

# Wireless FocusPRO® Systems

## The Problem Solver

Thanks to RedLINK™, the world's best-selling thermostat — Honeywell's FocusPRO — is now also wireless so it can go anywhere and solve any problem. Since there's no need to run new wires, there's no longer risk in bidding jobs. It all adds up to more jobs done more quickly, which adds up to more profits for you.

### RELOCATE A THERMOSTAT

In most homes, thermostats are located in areas where people don't spend the majority of their time. Now, with Wireless FocusPRO® — you can install the thermostat anywhere.

### UPGRADE TO MULTI-STAGE EQUIPMENT OR ADD COOLING

Put an end to pulling and snaking wires. Because all the wiring with our Wireless FocusPRO is done at an Equipment Interface Module by the equipment, adding multi-stage systems or cooling is a breeze.

### DISPLAY OUTDOOR TEMPERATURE AND HUMIDITY

It's often not feasible to run new wires outdoors. Our RedLINK-enabled Wireless Outdoor Sensor is the perfect solution — and displays outdoor temperature and humidity on Wireless FocusPRO thermostats.

### TEMPERATURE CONTROL ON DEMAND

Part of the Wireless FocusPRO system is the Portable Comfort Control. It senses temperature wherever it goes giving homeowners the freedom to make adjustments from any place in the home. Plus — with the added information of outdoor temperature and humidity on the Portable Comfort Control — your customers can make informed decisions on saving energy. If it's cooler outside than inside, homeowners can turn their system off to save energy.

# Wireless FocusPRO® Systems Ap

Wireless FocusPRO thermostats are the same FocusPROs you already know and love — now wireless — and now able to communicate with other RedLINK™-enabled devices for a complete system approach that installs in the same amount of time.

## 1 EQUIPMENT INTERFACE MODULE

- Wire to the equipment using standard terminal designations and easy-to-wire push terminals
- Press connect to communicate with Wireless FocusPRO to run the equipment
- Common-sense LED lights show when the RedLINK signal is detected and devices are connected

## 2 RETURN AIR SENSOR

- Wire to Equipment Interface Module for backup control if homeowners forget to change the batteries and the system loses power
- High (82°F) and low (62°F) temperature limits to protect the home

## 3 WIRELESS FOCUSPRO THERMOSTAT

- Installs with no wires at the thermostat location
- Universal with up to 3 stages of heating and 2 stages of cooling
- Available in both programmable and non-programmable models
- Communicates with all RedLINK-enabled devices
- Large-backlit display
- Easy-access battery replacement
- FREE Private Labeling

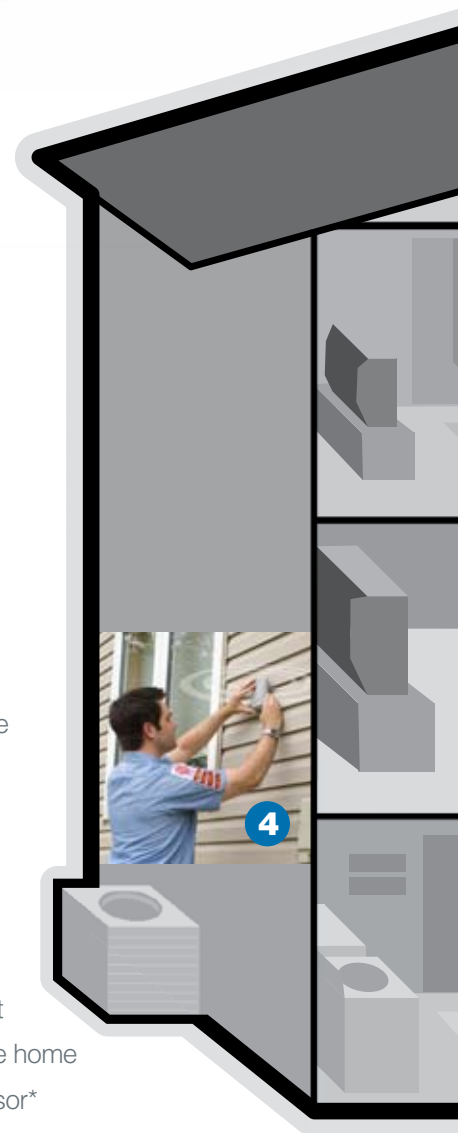

## 4 WIRELESS OUTDOOR SENSOR\*

- Installs wirelessly with two simple screws and a touch of a button
- Displays outdoor temperature and humidity on Wireless FocusPRO and the Portable Comfort Control
- Features weather-resistant cover and lithium batteries for reliable performance in any climate
- Up to a 5-year battery life

## 5 PORTABLE COMFORT CONTROL™

- Connects wirelessly to communicate and work with the Wireless FocusPRO thermostat
- Gives homeowners the freedom to sense and control temperature from any room in the home
- Displays outdoor temperature and humidity when used with the Wireless Outdoor Sensor\*
- Can be paged (if lost) with an audible noise from the Wireless FocusPRO

*\*Standard in all Wireless FocusPRO System Kits*
